1. Background

Scholar Nepal Pvt. Ltd. hereafter referred to as “Scholar Nepal” is a multi-disciplinary consulting firm committed to provide the best knowledge-based solutions and specialized expertise for sustainable development. It was established on 17th June 2013 under the company Act 2006. Scholar Nepal provides specialists advisory and consultancy services in various development sectors in Nepal and outside in an effective and efficient manner. The consultancy services are undertaken by Scholar itself and also in partnership or association with local and international consulting firms/organizations. Scholar Nepal also has a dedicated and highly professional team with decades of thematic and field-level knowledge. It has carried out different assignments in multi- disciplinary fields as reflected in the profile of the organization.

The company has a pool of qualified and experienced resource experts/specialist of diverse fields to deliver the professional services to the esteemed clients as per their need. We chose to draw the required skills and expertise from others and also around the world through our links/network whenever necessary. The combination of specialized expertise and the experiences of the company have gained strengths to undertake and complete challenging assignments and achieve sustainable development. Scholar Nepal believes in teamwork and the company always works with the collaborative inputs of professionals and organizations to achieve its goal.

The organization is also well equipped with a range of hardware items and experienced backstopping and logistics teams that is critical to maintaining the health and safety of staff members, provision of timely financial support and communication tools to enable swift mobilization of field teams to remote locations. Scholar Nepal is committed to maintaining the highest possible professional standards in all the work it carries out and the services the firm provides. Scholar Nepal is conscious of its responsibility to transfer specialized knowledge and experience to those who remain to continue the professional development. It is the policy of the firm to move ahead in line with new scientific and technology development and innovation in the fields of its operation. At the same time, the company is conscious about the application of appropriate technology and innovations. As a knowledge- based organization, our shared knowledge is our main resource. Particularly in the light of the fast growth of specialization, Scholar Nepal also maintains policy to nurture close co-operation and association with other domestic consulting firms. These enable participations in projects with other domestic firms in joint venture or association. Our values focus on integrity, people and teamwork.

We embrace the highest standards of personal and professional integrity. Our business principles are never compromised. The professional team is the most important competitive resource of Scholar Nepal- the true asset of the firm. It is only through our professional team that organization’s vision could be realized. Teamwork is fundamental to the organizational culture. We respect and value input and opinion, and encourage innovation, creativity and entrepreneurship. We treat each other with trust and respect.

The company is very much focused on the followings aspects:

- a) Professional Ethics;
- b) Timely Performance;
- c) High Standard;

- d) Total Quality Assurance;
- e) Cost Effectiveness;
- f) Client Satisfaction

2. Vision

To be a national leader and international competitor by consistently delivering quality consulting work that meets the international standards.

3. Mission

- a) Strive to support the projects/assignments with the most advanced technology, skill sets and consistently improve deliverables to clients.
- b) Ensure consistent delivery of innovative solutions reinforced by responsive client services and a commitment to quality and excellence.
- c) Aspire to lead the national and global markets by delivering standard services to satisfy the needs of clients, the growth and pride of our employees and the overall satisfaction of competing in the consulting profession.

4. Objectives

The primary objective of the organization is to advance Nepal's sustainable development by delivering high-quality, evidence-based and specialized technical expertise and professional services. The specific objectives are as follows:

- a) Consultancy services to federal, provincial and local governments, development partners, INGOs/NGOs and the private sector in areas such as policy and regulatory reform, planning and development, capacity development, and programme & project design.
- b) Research, assessment and evaluations that generate evidence for informed decision-making, improved service delivery and effective public sector management.
- c) To provide development initiatives by offering context-appropriate expertise in the governance, public financial management, institutional strengthening, climate change and sustainable development.

5. Sector Expertise

Scholar Nepal has been operating across all three tiers of government in Nepal—federal, provincial, and local levels since 2013. It has been engaged with local governments, provinces, and the federal government through various programs and projects funded by the Government of Nepal and development partners. The organization's major sectors of work include:

5.1 Planning and Project Development: Preparation of master plans, project banks, periodic plans and GIS-based Geo-Spatial Periodic Plans, Strategic Sectoral Plans, transport master plans with road bylaws, IPT and building bylaws, IRDP, DEDSP, Medium-Term Expenditure Framework (MTEF), project

impact assessments, MIS-based project banks, and project bank guidelines for local, provincial, and federal governments; along with resource mapping, GIS mapping, SDG localization, and plan evaluations for sustainable development are among several key accomplishments of Scholar Nepal. **Landuse Plan, Land Act, Land Classification:** Preparation of LGs Land Use plan, Land Act, classification of land by using GIS, satellite image other relevant tools and technologies.

5.2 Public Financial Management:

The Scholar Nepal team expertly designed and developed a comprehensive Project Bank Management Information System (PBMIS) for the National Planning Commission (NPC) and federal ministries. This system, created under the PEFA framework in collaboration with the World Bank and NPC, serves as an integrated digital platform that captures, validates, analyzes, and manages project data to support informed decision-making, project appraisal, and prioritization at federal, provincial, and local government levels, significantly enhancing transparency, efficiency, and coordination in Nepal's development planning processes

5.3 Municipal Revenue Enhancement:

Scholar Neapl's role extends to preparing Revenue Improvement Action Plans (RIAP) and providing Outcome Strategy and Results (OSR) support to boost fiscal discipline and transparency in local governments.

Additionally, Scholar Nepal has contributed significantly to formulating the PLGSP Operating Guidelines through broad consultations, strengthening governance and resource mobilization at provincial and local levels. These efforts collectively reinforce municipal fiscal autonomy and capacity for sustainable local revenue generation

5.4 Agricultural Value Chain: The primary objective of this organization is to lead comprehensive research in the areas of Climate Resilience and the Agricultural Value Chain System, with a focus on understanding the impacts of climate change on agriculture and identifying innovative solutions that can help mitigate these effects. The organization aims to generate valuable data, insights, and evidence that will support the development of sustainable and climate-smart agricultural practices, as well as strengthen the resilience of agricultural systems to climate-related shocks and stresses.

Additionally, the organization is committed to disseminating best practices and proven strategies to stakeholders across various sectors, including farmers, policymakers, agricultural producers, and community leaders. By sharing knowledge on effective climate adaptation and mitigation techniques, as well as sustainable farming practices, the organization aims to empower stakeholders to take proactive steps toward building more resilient agricultural systems. This includes promoting the adoption of climate-smart agriculture, sustainable land management, water conservation practices, and the use of drought- and flood-resistant crop varieties.

A critical component of the organization's mission is to provide technical support and capacity building to local governments (LGs) in the design and implementation of policies and laws related to climate resilience and the agricultural value chain system. This support includes helping local governments understand the intricate relationship between climate change and agriculture, developing the necessary tools and frameworks to integrate climate resilience into local agricultural planning, and ensuring that policies reflect both current and future environmental challenges. By guiding LGs in the formulation of sound climate resilience laws and agricultural value chain policies, the organization seeks to foster an enabling environment that promotes sustainable development, economic growth, and food security at the local level.

5.5 Governance & Management: The company has assisted in the preparation of working manuals and guidelines, PLGSP implementation Guideline/UNDP, NBSAP/UNDP, GEDSI guidelines, project preparation and appraisal, procurement, and service delivery for both governmental and non-governmental organizations. It has also reviewed and drafted policies and other legal documents of governments. Public financial management expertise includes creating strategies, action plans, and fiscal and tax policies that generate revenue and local and regional economic development projects.

5.6 Capacity Development: The firm has extensive experience designing and implementing capacity development programs across all three tiers of government in Nepal. Our work focuses on strengthening institutional systems, enhancing technical and managerial skills, and improving service delivery capacities of federal, provincial, and local governments and preparation of Capacity Development Plan. We support governments in areas such as policy formulation, planning and budgeting, fiscal management, digital governance, sectoral service delivery, and intergovernmental coordination.

Through training, mentoring, technical assistance, and development of practical guidelines and tools, we have helped government institutions build stronger, more accountable, and efficient governance systems. Our programs promote cooperative federalism, evidence-based decision-making, and sustainable institutional strengthening across Nepal's evolving federal structure.

5.7 Local Economic Development (LED): The primary objective of this organization is to conduct research in **Green Economics** and **Local Economic Development (LED)**, collaborating with institutions like **Kathmandu University School of Management** and independent researchers. The organization aims to explore sustainable economic models that integrate green practices into local development strategies, focusing on creating low-carbon, resource-efficient systems that promote economic prosperity and environmental sustainability. In partnership with academic and research institutions, the organization conducts high-quality, evidence-based studies on the intersection of green economics and LED. This research addresses key challenges such as the adoption of **green technologies**, **renewable energy solutions**, **sustainable resource management**, and eco-friendly business practices. It also evaluates the socio-economic impacts of green policies, exploring how they can improve livelihoods, generate employment, and enhance the long-term sustainability of local communities.:.

5.8 Disaster management: Preparation of LDRMP, Disaster Risk Area Identification and Hazard mapping, Environmental impact assessments (EIA), disaster risk management planning, Topographical survey and River training works, Initial environmental Examination (IEE), and environmental planning are all included in disaster and environment management.

5.9 Climate Change & Environment: Scholar Nepal has experience supporting climate-responsive development planning and environmental management across federal, provincial, and local governments. The firm has contributed to climate vulnerability assessments, LDCRP preparation, and integration of climate adaptation measures into local planning processes. We support municipalities in mainstreaming climate and environmental safeguards in accordance with national standards and UNDP frameworks. Our team provides technical expertise in climate resilience, disaster risk reduction, and ecosystem-based approaches. Through evidence-based analysis and capacity development, we help strengthen institutional systems for sustainable and climate-resilient development.

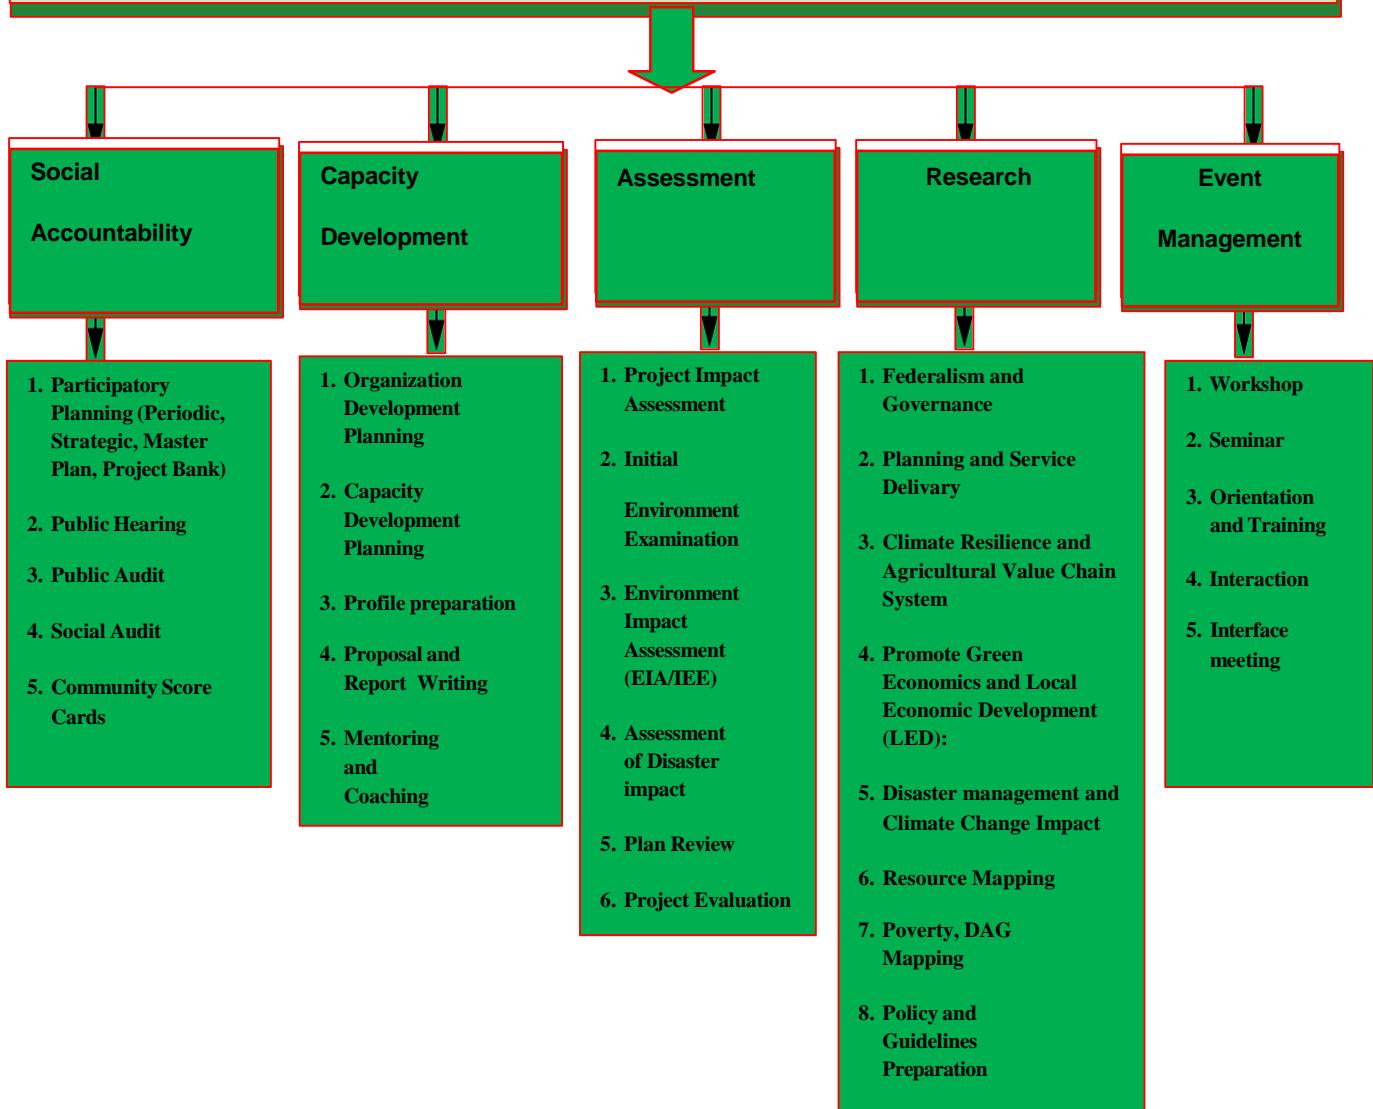

5.10 Digital Transformation and Technology: The company has capabilities and experience in GPS/GIS/Drone technologies, resource mapping, digital profile development, and geospatial analysis for improving the different pillars of governance. By conducting End line surveys, building databases, and assisting the government in data analysis using statistical and GIS tools, Mobile Apps (KOBO, ODK). Scholar Nepal has helped the government (federal and subnational) create evidence for strategic planning, infrastructure investment, economic development, and service delivery Preparation of municipal digital profile by using mobile apps (KOBO & ODK) and preparation of children profile based on CFLG guideline.

5.11 Social Accountability: The company has supported governmental organizations in the design and execution of community scorecards, public audits, social audits, and social accountability frameworks.

1. Human Resource

Scholar Nepal has highly skilled technical, managerial and admin staffs for successful execution of its assignments. The company operates with a mix of permanent in-house personnel and outsourcing consultants available on call. The company draws in a pool of around three dozen resource persons/consultants comprising of all major professional disciplines to cater the client requirements.

WORKING AREA OF SCHOLAR NEPAL

2. Professional Staff

3. At present, Scholar Nepal has three professional directors along with a pool of highly qualified professional associates. These associates bring rich experience from their respective fields. His specialization is in the fields of Federalism, Public Policy, Inclusive Governance, Green Governance/Climate Resilience, Service Delivery and social accountability.
14	Er. Umesh Agrwal (Urban Planner/Engineer)	Urban Planning and Capacity and Capacity Development	Er. Umesh Agrawal has more than 20 years of working experiences in the areas of urban infrastructure development, planning, urban design, infrastructure design, project development, project appraisal, and project bank. He holds civil engineering degree, master in urban planning, and MBA. His specialization is in the fields of project development and appraisal.
15	Dambar Singh Pujara (MA Geography and GIS)		Mr. Pujara has 20 years of GIS expertise in Digital Mapping, Digital GIS database preparation. He has good knowledge on Digital GIS database preparation and its management as well as attribute data management. His experienced in Digital Mapping (Base Map production, Lidar data processing, Satellite Image Processing). He has good Knowledge in Digital Photogrammetry and Satellite Image Processing, Conversant in GIS database and application development. He is able to work in multi (cultural environment and GIS Trainer on ArcGIS and related software. Besides, he has in-depth knowledge on ArcGIS, Arc view, Arc Info, ERDAS IMAGINE (Remote Sensing Solution), AutoCAD, Micro Station, Nigmas and MS office.

4. Fixed Assets and Equipment

At present, Scholar Nepal has essential equipment and fixed assets to run office and conduct assignments.

Followings are the list of equipment and fixed assets.

Items	Quantity	Status
Office space with 3 telephone line	2000 Sq ft	Office space is rent
Laptop and Computers	8+7	In office use
Printer	7	In office use
Fax/Photocopy/Scan Machine	1+2+1	In office use
Table/Chair/Rack	27	In office use
Sofa set	2	In office use
Glass table	1	In office use
GPS	5	In office use
Air condition	1	In office use
Android Tab/Mobile for Data collection	5	In office use
Camera	2	In office use
Vehicle (Ford-Trend) Ba 20 Pa 2661	1	In Office Use
Motorbike Honda Ba. 31. Pa. 4888	1	In office use
Scooter Honda Ba. 50 Pa 2716	1	In office use
Motorbike Bullet Ba. 80. Pa. 2716	1	In office use
Motorbike Bullet Ba. 88. Pa. 7615	1	In office use
Scooter Honda Ba.90 Pa 2808	1	In office use

5. Associates and Networks

Scholar believes in establishing effective networks to synergize knowledge, expertise and experience. We have a track record of successful partnerships and collaborations with several local, national and international agencies.

Annex 1: Ongoing Projects:

Year	Client Name	Title of the Assignments
2082	UNDP/PLGSP Nepal	Strengthening OSR of Local Governments in Nepal (25 LGs across Five Provinces : Sudurpashim, Karnali, Lumbini, Gandaki, Madesh)
2082	S2 GESI Project of GIZ	Capacity Development of Gender Equality and Social Inclusion (GESI): Health Sector (6 LGs across Lumbini , Suderpassim provinces)
2082	Caritas Nepal	Preparation of Local Disaster and Climate Resilient framework (LDCRF) of Kawasoti, Hupsekot and Lamahi LGs

Annex 2: Major Assignments Accomplished

Year	Client Name	Title of the Assignments
2082	GRAPE/GIZ	Study on Climate Resilient Agriculture Value Chain of Karnali and Sudurpashim Provinces.
2082	FRTC, Pokhara	Feasibility study of Seti-Madi Watreshed
2081	MoF/ UNDP	(Nepal Bio-diversity Strategy Action Plan) NBSAP
2081	MoFAGA/ UNDP	Implementation guideline of PLGSP, MoFAGA/ UNDP
2081	ADB	Resource Mapping and Growth Diagnostic Study in Lumbini Province & Strengthening Project Bank in Gandaki Province
2081	Mahalaxmi Municipality	Geospatial Based Plan Preparation
2081	Panchapuri Municipality	Geospatial Based Plan Preparation
